

8 May 1984

MEMORANDUM FOR: Director of Central Intelligence  
FROM: SA/DCI/IA  
SUBJECT: Late Item for PFIAB Session

1. I have been informed that you may get a question concerning the status of the Agency Reserve Corps. The Agency Reserve Corps consists of two components--an active and an inactive reserve. PFIAB is no doubt concerned about the inactive reserve program which is, as you know, a relatively new program. The purpose of the inactive reserve is to have a cadre of Agency annuitants who have retired since January 1984. It is intended to provide a surge capability for the Agency consisting of people who can be brought back on contract very quickly for a 60-day period.

- The program was instituted in January.
- Thus far ☐ annuitants have been reviewed and ☐ have been nominated.
- These have been undergoing additional screening including medical tests.
- At the present time various career service panels are in the process of contacting the nominated annuitants.
